YANAMANDALA VANDANA

+91-7013618187 | vandanayanamandala@gmail.com | Tirupati, Andhra Pradesh | GitHub | LinkedIn

Professional Summary

Aspiring AI/ML Engineer with a foundation in Python, SQL, and data analysis. Interested in machine learning, exploratory data analysis, and data-driven problem solving. Experienced in developing web-based projects and analyzing restaurant data using Python visualization libraries and interactive dashboards. Eager to apply analytical thinking and programming skills to real-world AI/ML and data science problems.

Education

B.Tech in Computer Science and Engineering 2022 – 2026
Sri Venkateswara College of Engineering (SVCE), Tirupati *CGPA: 8.97/10*

Intermediate (MPC) 2020 – 2022
Sri Chaitanya Academy Junior College, Tirupati *CGPA: 10/10*

Secondary School Education 2019 – 2020
Sree Bhuvana Vidhyalayam, Piler *CGPA: 10/10*

Technical Skills

- **Programming Languages:** Python (Basics), Java (Basics), JavaScript
- **Data Analysis:** Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Data Visualization
- **Visualization Tools:** Matplotlib, Seaborn, Plotly
- **AI/ML Fundamentals:** Foundational understanding of AI/ML concepts; interested in machine learning and computer vision
- **Web Technologies:** HTML, CSS, JavaScript, Streamlit
- **Database:** SQL
- **Tools:** Jupyter Notebook, Git, GitHub
- **Soft Skills:** Problem Solving, Critical Thinking, Collaboration, Adaptability, Time Management

Projects

Zomato Restaurant Data Analysis and Dashboard GitHub Repository
Data Analytics Project *Python, Pandas, NumPy, Matplotlib, Seaborn, Streamlit*

– Performed exploratory data analysis (EDA) on the Zomato restaurant dataset to identify restaurant trends, customer preferences, ratings, and pricing patterns.
– Analyzed restaurant locations, online ordering, table booking, cuisines, ratings, votes, and cost for two using Python data analysis libraries.
– Created visualizations to examine rating distributions, popular cuisines, online ordering trends, and relationships between restaurant cost and ratings.
– Identified BTM Layout as the area with the highest restaurant count and found that approximately 58.87% of restaurants offered online ordering in the analyzed dataset.
– Developed an interactive Streamlit dashboard to present restaurant analysis and visual insights.

Experience

MotionCut
Python Intern

– Practiced Python programming concepts, progressing from foundational topics to more advanced concepts.
– Applied the concepts learned by developing a To-Do List application as a project.

Certifications

- Python Course Completion – Udemy
- The Joy of Computing Using Python – NPTEL
- Front-End Development: HTML, CSS, JavaScript – Great Learning

Areas of Interest

Artificial Intelligence, Machine Learning, Data Science, Exploratory Data Analysis, Data Visualization, Web Development, Competitive Programming
